EXPERIENCE

Full Stack Software Engineer

Brandmovers Inc.

📅 12/2019 - Ongoing

- Full Stack Developer working on brand loyalty platform CMS, allowing for multiple tenants.
- Joined the project at the beginning and has seen the platform grow from 1 client to 15, and the development team from 3 members to 10.
- Developed key custom features for multiple client launches such as receipt upload moderation, parsing of API and SFTP data, customized interfaces, and custom business logic while maintaining extensibility.
- Continually adds enhancements that increase performance, add to the feature suite, and streamline development processes.
- Provides mentorship to new developers on the team in order to help familiarize them with the codebase and established design principals.

Software Engineer

Mather Economics

📅 01/2019 - 12/2019

- Software Devloper on web analytics platform meant to drive client business strategy by using collected data.
- Worked with many clients for onboarding, support, and feature development.
- Participated in the Google News Initiative as a vendor for selected clients as a way to support digital media.

Software Engineer

Hewlett Packard Enterprise / DXC Technology

📅 05/2018 - 12/2018

- Supported web portal application used by the State of Florida to maintain Change Requests submitted for the Medicaid Management System.
- Developed enhancements to the application which lead to productivity increases from a more streamlined process.

IT Business Analyst

Hewlett Packard Enterprise / DXC Technology

📅 03/2016 - 05/2018

- Acted as a liaison between client and technical solutions / support groups.
- Participated in large projects such as the Social Security Removal Initiative, and account contract renewal enhancements.
- Completed volunteer projects which lead to a transition into a full time Software Engineer.
